

Furnival Chambers prides itself on striving for equality. The recent events in the United States of America and the unlawful killing of George Floyd have once again brought into global focus the very real disparities that the black community faces in society, both overt and nuanced and which are equally applicable in the UK as they are in the USA. We, as a Chambers, reject structural and institutional racism at all levels.

We believe this is an issue that reaches far above party politics and we unequivocally stand in solidarity with the movement for change, at every level.

We are proud of our records as professionals and individuals in standing up for justice for all and see now as a time to consolidate and focus on how to effect real change in society to ensure not one more life is lost. We pledge that we will tackle bias (both conscious and unconscious), discrimination and racism wherever it is found.
